QUALITY MANAGEMENT

SAFETY COMMITMENT

A. Use of eco-friendly material and paint

- slip-preventing top board
- HPL with high durability and resistance to deformation
- The 8 metals-free zinc powder
- Use of imported official European coating material

Eco-friendly Material Certification and Quality Certificate

Paint Quality Certification Mark

C. Ergonomic Design for Different Age Groups

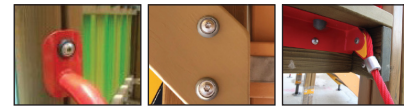

- Structural design suitable for each stage of physical development by age
 - Age classification pursuant to domestic laws and regulations
- ㉓ Preschooler playground
(under 5 years old - Internal design standards applied)
- Slope (15 to 38 degrees),
Slope incline (38 to 45 degrees),
Slide (less than 30 degrees)
 - Maximum falling height (less than 1,000m),
upper structure height (more than 1,200mm)
- ㉔ Regular playground
(Over 5 years old - Safety standards applied)

E. Complying with the spatial integration design checklist

- **Space / Design** - Safe distance between facilities ,
Classification by age group
- **Moving line** - prevention of collision, and separation
of lines according to different play elements
- **Playing facility arrangement** - Slide locations,
separately placed according to different play facilities
- **Function** - Storytelling, suggestion of specialized
play elements
- **Design** - Innovative concept and appearance ,
Harmony with landscape
- **Safety** - Non-entangled U-ring, design that prevents
fall hazard, use of eco-friendly material

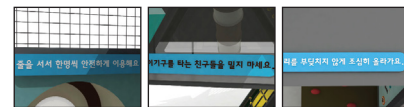

B. Product safety

- Finishing material safety - Cracking
prevention, maintenance of usage safety
- Bonding safety - Special tool, rust-proof material
- Application of official European imported goods

D. Installation of Guide Boards for rides

- ㉓ Guide icon for each material in the entry
of the playground
- ㉔ **Wood material** - Intaglio marking on the
wooden surface
- ㉕ **Steel material** - Paint marking on the
steel surface
- (Indicate method of guide plate can be varied
depending on the site situation)
