4. Contact Us

Skyfitness specializes in creating comprehensive outdoor fitness and playground equipment that allows for the full utilization of outdoor spaces.

We combine current fitness trends with the ever-growing desire and need for outdoor activities. Our outdoor equipment is designed with inclusivity in mind, catering specifically to:
- Athletes looking for a workout
- Young people seeking fun
- Seniors looking for healthy daily activity
- People with disabilities seeking tailored public facilities
- Children, offering safe fun while developing motor skills and coordination

Pre- and post-sales support are among the company's key strengths.
A member of our team will always respond promptly to your questions or needs—which is why so many public and private facilities choose Skyfitness.

A team of experts is always available to assist you, from the initial quote to project completion.

Skyfitness guarantees ongoing support from our technical department, enabling public and private entities to invest in a safe, durable, and functional project.

Contact Us

Our philosophy:

safe areas for everyone.

13 YEARS

13 years of ideas, 13 years of development and listening to the customer.

Skyfitness began as a small startup, born from the vision of Giada Barzon and Davide Tavani—the founders and current directors of Skyfitness Srl.
Following its initial phase, and driven by a growing client base and rising interest in outdoor fitness, the company now operates with agents and retailers across Italy, maintains an administrative headquarters in Treviso, and runs two distribution warehouses.
The production chain is strictly European and includes a significant manufacturing stage in Italy dedicated to creating exclusive, uniquely designed products—such as the stainless steel range and the Metra line.

CERTIFICATIONS

Our certifications include TÜV SÜD for products and ISO 9001 for business processes. We also hold CAM certification, which guarantees low-environmental-impact processes.

Gender equality is also of great importance to us; therefore, we comply with the UNI/PdR 125-2022 standards.
For the US market, we adhere to ASTM standards.

Web App

The Web App provides everyone with exercises suited to their athletic experience, based on the available time and the type of workout.
Using GPS location, it suggests the nearest parks featuring Skyfitness equipment.
It recommends local exercises based on the time you have available, your fitness level, and your specific training goals.

WELCOME AND INFORMATION BOARDS

A warm welcome makes all the difference. A sign at the entrance creates the first impression of your facility for visitors.

Upon request, we provide an information board for the fitness area containing instructions on the proper use of the equipment. We will select a graphic style that aligns with your brand and reflects the image you wish to convey.

Every piece of Skyfitness equipment features a dedicated information board with guidelines on correct usage and all relevant regulatory details.

WORKSHOP & OPENINGS

Skyfitness can also support you in promoting your new fitness area. We can provide photos, articles, and communication materials tailored to your needs.

OPERATIONAL LEASING

Financial solutions that meet the needs of private customers through operational leasing options.

MAINTENANCE

Our maintenance services are designed to optimize the performance and lifespan of your equipment.

SURFACING

You can choose from various colors of poured-in-place rubber safety surfacing, impact-absorbing synthetic grass, or cellular paving systems—or rely on us for specialized solutions for sites subject to environmental restrictions. Whatever the area's requirements, we are ready to propose the most suitable solution.

COLORING

The customizable sections consist of both metal components and plastic parts (backrests and seats). This allows for specific color combinations, and the paint—formulated for outdoor use—can be applied with either a matte or glossy finish.

There are 16 solid colors or Corten-effect finishes to choose from.

RAL metal finish

RAL-colored HDPE

Our Projects

Italy has seen a significant rise in outdoor fitness activities in recent years, with more and more people embracing the benefits of exercising in natural settings. This trend has been driven by a growing awareness of the importance of physical and mental well-being, as well as a desire to connect with nature.

Skyfitness has played a pivotal role in driving this movement. As a leading provider of outdoor fitness equipment and solutions, Skyfitness has been instrumental in transforming public spaces into vibrant hubs for physical activity. By offering a wide range of innovative and durable equipment, Skyfitness has enabled communities across Italy to create accessible and engaging outdoor fitness areas.

BODY WEIGHT

CALISTHENICS

for experts and novices

Calisthenics is a form of exercise that uses your body weight as resistance to build strength, improve flexibility, and enhance overall physical fitness. It encompasses a wide range of movements, from basic push-ups and squats to more advanced skills like muscle-ups and front levers.

MACHINERIES

FOR ALL LEVELS

for every goal

Equipment designed for seniors, children, and young adults, available with or without adjustable resistance. It enables personalized workouts suited to various fitness levels. All equipment is guaranteed for outdoor use and is weather-resistant; additionally, all external moving parts are protected by plastic caps to reduce maintenance costs.

3a

BODYWEIGHT

CROSS-CUTTING AND MODULAR

Bodyweight and functional exercises

Circuits

Calisthenics circuits are the fundamental principle of the Skyfitness circuit training method: a workout designed to efficiently strengthen the entire body.

Single exercises

Envisioning an outdoor park without individual pieces of equipment would mean depriving athletes of additional training opportunities. Each piece of equipment is selected to offer specific physical benefits to citizens or clients.

Functional

Functional training is a type of controlled movement that aims to improve and develop everyday movements.

Metra

Metra is a designer outdoor gym by Skyfitness; thanks to its minimalist lines, it is ideal for high-end hospitality venues and fitness areas. With the addition of just a few tools and accessories, it transforms into a complete, functional gym for bodyweight training, calisthenics, and functional training.

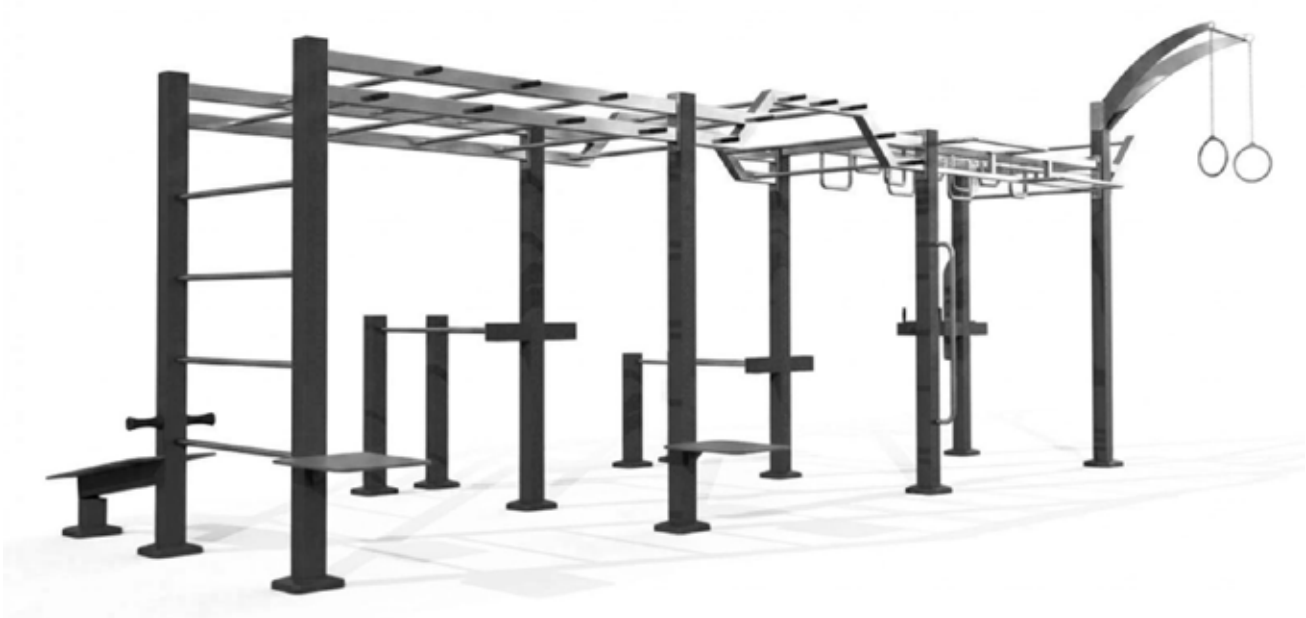

Circuits

Circuit training is a form of exercise that involves performing a series of exercises in succession, with rest periods between them. This type of training is excellent for improving cardiovascular health, strength, and endurance. Circuit training offers a full-body workout, incorporating exercises that target a different muscle group with each movement.

Skyfitness calisthenics circuits are outdoor structures designed to withstand any weather conditions.
They enable athletes—both professional and recreational—to perform complete workouts in total safety.

ACCESSORIES

Purchasing this product includes the accessories needed for a complete workout: 10kg dumbbells, a punching bag, TRX straps, resistance bands, and kettlebells.

OVER 7 WORKOUT STATIONS

Metra offers more than 7 workout stations, including: a movable flat bench, parallel bars, vertical stall bars, Swedish stall bars, pull-up bars, and a barbell rack.

Single Exercises

Creating a personalized calisthenics training area is about more than just building a workout space; it is about creating a personalized fitness journey. By designing a setup tailored to each user's specific goals and abilities, you create a truly unique space.

Individual calisthenics units are designed to complement a calisthenics circuit and offer you a personalized workout experience using products specific to each exercise.

MACHINERIES

DURABILITY AND VERSATILITY

low-maintenance and perfect for any area

Exclusive Line

A range of outdoor fitness equipment featuring high-strength galvanized steel structures, designed to ensure optimal performance in all weather conditions.

Green Power Line

Each piece of equipment is designed to provide a workout with a guided movement path, featuring ergonomic geometries engineered to maximize movement effectiveness and user safety.

Strength line

This line features a range of muscle-strengthening machines with load capacities of up to 220 kg, constructed from high-strength steel to ensure stability, safety, and high performance under all conditions of use.

Cardio Line Pro

This outdoor equipment is smart, featuring Zwift connectivity, integrated mobile device charging, and real-time monitoring for a comprehensive, interactive cardiovascular workout experience.

Inclusive Line

Our line of outdoor equipment is designed to ensure accessibility, safety, and independent use for people of all ages and varying physical abilities, promoting well-being and inclusion in any setting.

Exclusive Line

MACHINERIES

The Exclusive line makes it possible to stay fit and active, regardless of age or fitness level.
These robust, durable machines are designed to work almost all major muscle groups, making them versatile for any setting.

Exclusive line machines do not feature adjustable resistance cylinders; instead, users train using their own body weight and strength, ensuring a workout perfectly balanced to each athlete's capabilities.

Inclusive Line

Our inclusive fitness equipment is designed to be accessible to people with various physical disabilities, including wheelchair users and individuals with limited mobility, visual impairments, or advanced age.

A truly inclusive area is created by listening to the needs of those who will use it every day; only in this way does it become a space of shared well-being that is accessible and dignified for everyone.
