# COMPANY PROFILE

Adlis Smart / Weiyin Technology Co.,Ltd

Adlis smart is a department of the company VPL-PRODUCTION LTD that was created in 2015 with the objective of developing new technology in 3 branches. We are specialized in manufacturing and developing smart benches, smart table, Smart home and smart Container. We develop our own App to control each smart product. In 2019 we closed agreements, partnership and manufacture together the construction of all products with WEIYIN company. While in Israel we have our laboratory for the development of new products, Adlis and WEIYIN manufacture the products together in China. We work in different countries of the world and our products are valued in each of our clients and the countries where we are established.

Shenzhen Weiyin Technology Co.,Ltd which was established in the year of 2012. Specialized in different kinds of solar smart street furniture, including solar benches, solar bus shelters, solar streets lights and solar garbage bins etc. Our first smart bench was developed in China in 2016, which works on only clean solar energy power thus decrease CO2 emission, and can provide free charging services for your phone or tablet, access to WI-FI network, bluetooth and led light, etc. Due to the patent certificates in hand, Shenzhen Weiyin Technology Co.,Ltd is now actually the only company together with ADLIS Co.,Ltd who can produce and sell this products.

Material: Stainless steel #201 / Concrete  
Dimensions: L- 210cm, W- 52cm, H- 45cm  
Weight: estimated 70kg

Arten benches have strong horizontal planes and large flat surfaces with an angularity that makes them come alive. The bench seat is thick at the center, progressively thinner as it expands toward the edges, and faceted where angles come together. The extension of the seating plane past the steel base at the ends makes the seat appear to float. Innovative right and left angled backless benches provide subtle corners, so people who are conversing can sit at angles to one another. Straight and angled benches play off each other. Benches can be placed end-to-end, or the end of one bench can be positioned against the back of another.

The Brand collection features a variety of unique and unconventional chairs and setting options that are bright in color and rather unusual in design. These chairs come with a geometric and modular design that give off a surrealist and rather abstract aesthetic. One standout piece from the collection includes the Brand Bench that comes with a neon yellow / Blue / Green / Lila / White / Black / Grey / orange corner panel, for the seat we adapt and design each benches to suit the client.

The unique design of this range is based on the aesthetics of the folded sheet steel. This was preserved and after a thorough redesign. Thanks to the sophisticated intersection of the walls of the structure, greater strength and hardness of the bench is achieved. The extended version offers a finer elegance in all variants of the finish. The basic version that best characterizes Radius's design is the all-steel bench with perforations in the seat, also in combination with Citépin plastic caps that eliminate the disadvantage of the cold steel surface for greater comfort. The wooden lamella seat version is an approved classic.
